

INFORMATION REQUEST FORM

Fugro Loadtest is ready to assist you in any way we can. We can help with the design, installation and testing components for a successful testing program. **Fugro Loadtest** provides the complete pile and barrette load testing services. Fugro Loadtest are the only licensed users of Osterberg Cell[®] (O-cell[®]) testing technology. We can also provide a complete range of pile load testing and quality assurance services including automated top-down static testing (ALT), dynamic load testing (DLT) including wave equation modelling (WEAP) including Cross Hole Sonic Logging (CHSL), lateral testing, specialist pile integrity testing, thermal integrity profiling and pile/wall calipering. Fugro Loadtest can also provide for all your structural and geotechnical monitoring needs. Please call or email this request form and we can determine how we may best assist you.

Should you require additional information regarding OSTERBERG CELL technology or details of our full range of testing services, please visit us at www.loadtest.com. To contact us via email, please use the "CONTACT" icon on the menu bar with your specific project requirements or fill in the request form below.
